DETAILED ACTION

Applicant's election of species with traverse of trisodium citrate (for the citrate), sodium acetate (for the acetate) and sodium lactate (for the lactate) is acknowledged. However, in view of Applicant's persuasive argument, the requirement of the species election made on the last Office Action is withdrawn. Accordingly, claims 1, 3, 5, 6, 8-15 and 57-74 are being examined on the merits and claims 16-56 are withdrawn from consideration.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1617

Claims 1, 3, 5, 6, 8-15 and 57-74 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,610,206B1 in view of Gupta (U.S. Patent No. 6,779,468 B1).

The difference between the claims in the patent and instant Application is incorporation of iron complex or iron salts set forth in claims 57-60. However, to incorporate noncolloidal ferric compound such as ferric pyrophosphate to dialysis composition in order to prevent or treat iron deficiency is obvious in view of Gupta. (abstract, column 1, lines 10-17, column 4, lines 15-23). Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to incorporate ferric compounds such as ferric pyrophosphate well known by Gupta routinely incorporated in dialysis composition in order to supplement iron to dialysis patients.

None of the claims are allowed.
